1.7.	We welcome the clarification made in guideline 2. Can EIOPA confirm that this guideline only applies when a transitional measure is used?

1.13.		
1.14.	<p><b>Guideline 7 – Interaction LTG measures and transitional measures with the risk margin calculation</b></p> <p>We do not see the added value of this guideline. Article 38 of the Delegated Acts states that future SCR should be discounted at the <b>basic</b> risk-free rate (i.e no LTG measures are allowed).</p> <p>When firms decide to use simplifications to calculate the risk margin and decide to apply the one described in “Guideline 61 – Methods to calculate the risk margin” paragraph 1.114 on the <b>Guidelines on Valuation of Technical Provisions</b>, the best estimate is calculated according to paragraph 77 of the Level 1 text (i.e discounted at the relevant risk-free rate).</p>
