16.00 – 16.45	Sustainability: the heart of mutuality Having a sustainability strategy is now mainstream for all businesses in all industries; customers expect it, other businesses expect it, governments and civil society expect it. Momentum for sustainability and issues around climate change and the sustainable development goals (SDGs) is gathering real pace as we move towards the next key accountability landmark for our planet, namely COP26 in November 2021. For many in the mutual sector, sustainability is baked into our values-based strategies. It is part of our mutual advantage, but many in the mutual sector are still grappling with framing and reporting on it. How do we engage in the SDGs, implement TCFD (Task Force on Climate-Related Financial Disclosures), “green” our investment portfolio, and ultimately have a net-zero impact on climate change? This session will look at what leading insurers are doing in sustainability and the leadership role mutual insurers play. Panel discussion moderated by Shaun Tarbuck , CEO, ICMIF Virginia Antonini , Group Head of Sustainability, Reale Mutua, Italy Kay Swinburne , Vice-Chair, Financial Services, KPMG, United Kingdom Eric Van La Beck , Head of SRI, OFI, France
